

Assignment #3: Planetary Remote Sensing

For class presentations Tuesday 29 March - send before (10am latest)

Pick a sensor / mission / planet

Your 4-slide mission -

- To explore the internet for information
- To seek out illustrative examples / technical data
- To boldly go where no 457'ers have gone before

Slides:

- Intro on planet e.g. presence of atmosphere, approx. size; sensor / years of operation
- Sensor details: bands, resolution, sample image
- Interesting image with description
- Publications / websites / future missions ?

Vulcan (left) and Klingon
