

Project Report 2014

It should include these items (with images as required):

- o A one-two paragraph summary of your project – goals, area, result

Study Area and Data Source

- o Study area
- o The data you need for the project (including image dates)

Data methods and analysis

- o brief description of methods (could use point form)
- o the primary resulting channels from analysis e.g. ratio or classification

Results

- o Final image display e.g. vectors on image
- o Final conclusions of successes or limitation

Evaluation based on these components:

Summary, Description of area and data, Methods, Results, Images selected, Overall complexity and completeness

Images do not need to be super high res. 150 dpi is suggested as enough (.jpg)
You can provide a zoom -in image if it helps to show details
Capture PCI images using export map -> (use jpg or tif);
capture other images using Gimp image editor or shift/prtsc -> paint or other

Please submit project as **doc** (or equivalent) and **pdf**
(doc in case of minor edits needed, pdf for final presentation)
