

History of Cartography

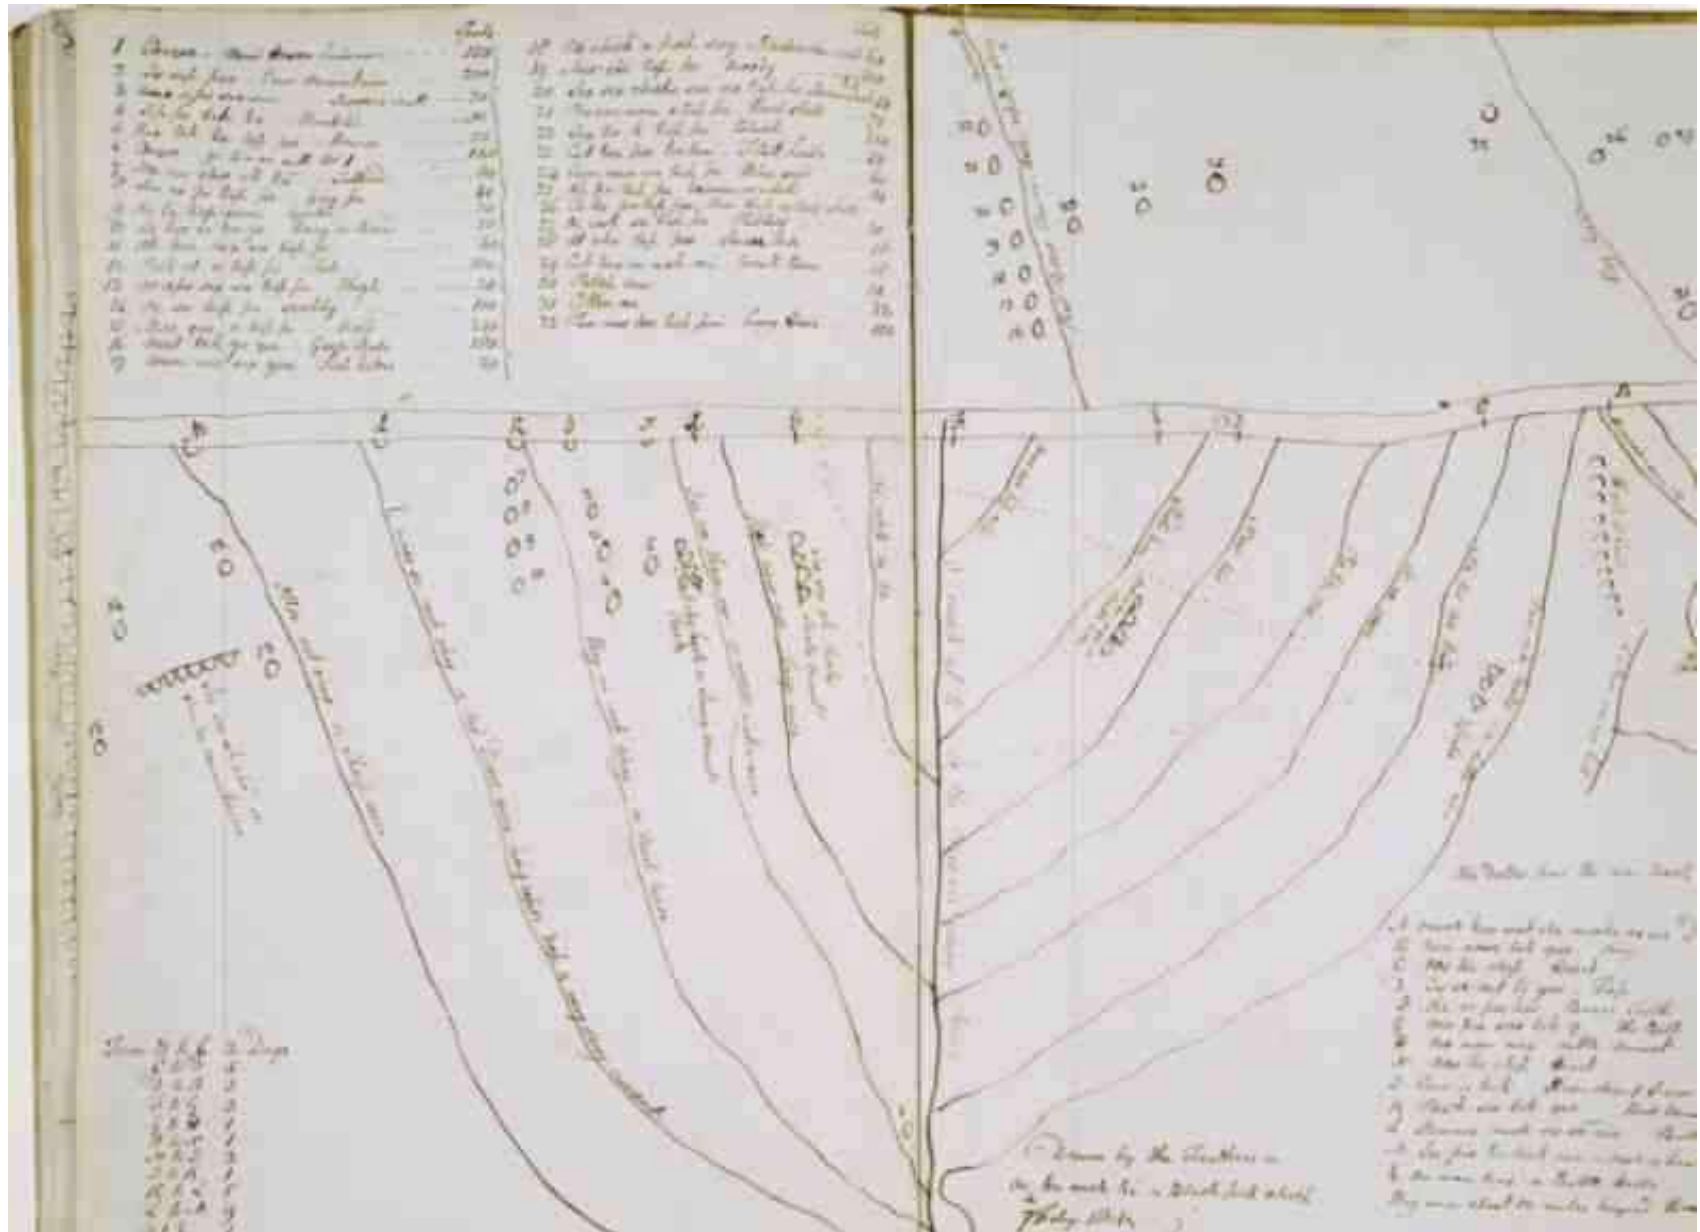

World's oldest map
Babylonia, 6th century BC

<https://www.geographyrealm.com/oldest-known-map-world/>

<https://www.gislounge.com/mapping-through-the-ages/>

In 1801, a Blackfoot named '**Ac ko mo ki**' drew a map in the snow or dirt for **Peter Fidler** of the Hudson's Bay Company.

Ancient Greeks

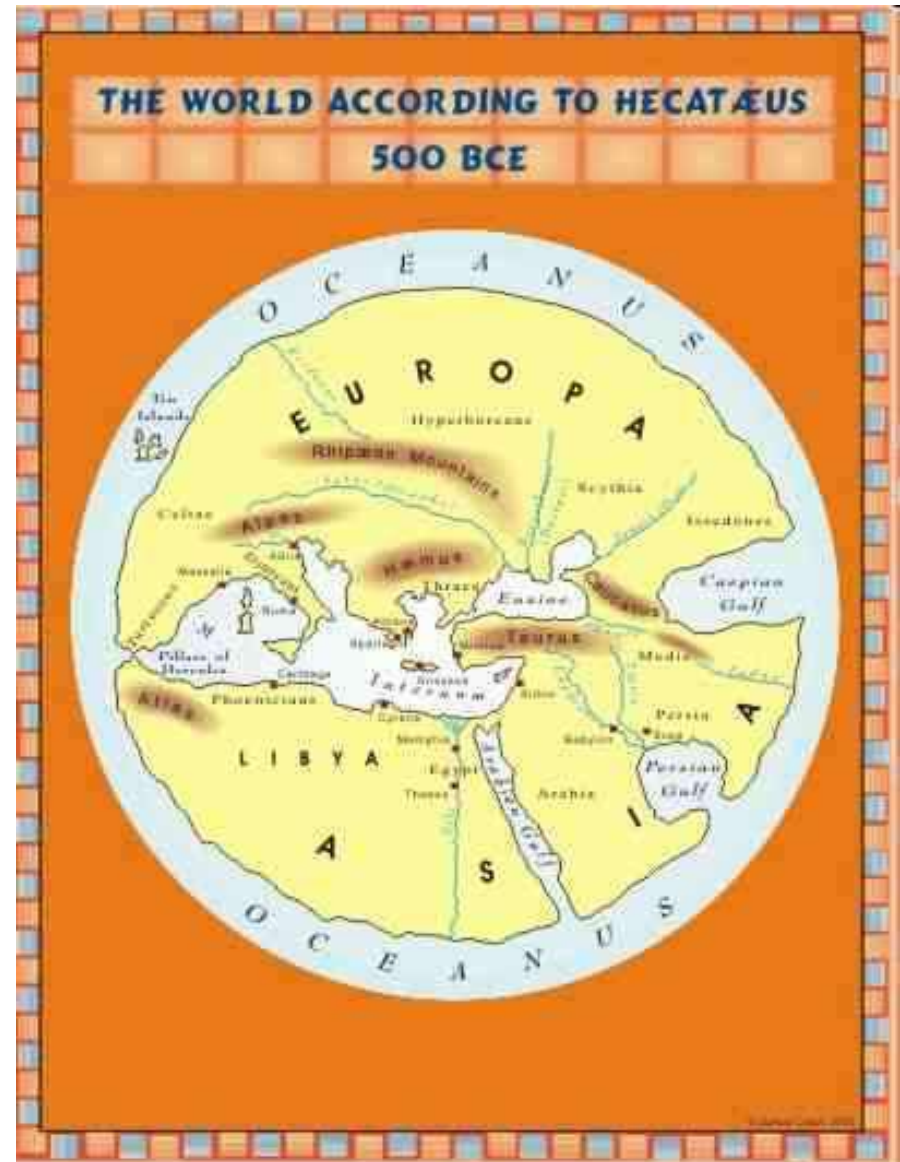

500BC – 500AD

Eratosthenes (275-195BC)
- circumference of earth

Hipparchus (190-120BC)
- latitude / longitude

First map projections
- azimuthal Thales, etc.)

Ancient Greeks

Claudius Ptolemy, (AD 90-168)

Ptolemy compiled all known world locations

- Overestimation of longitude extent contributed to Columbus 'bumping' into America

Roman world map reconstruction

AD 43

NORTH

Sun

WEST (evening)

Romans: Tabula Peutingeriana (4th century)

The Tabula Peutingeriana (*Peutinger table*) shows the road network in the Roman Empire. It is a 13th-century copy of an original map dating from the 4th century, covering Europe, parts of Asia (India) and North-Africa.

Early car navigation device, like the Peutinger table:

Pre-GPS GPS 1910s

The Medieval Dark Ages: “T-in-O” maps

T is the Mediterranean and Nile/Don Rivers O is the extent of the known world:

One continent for each of Noah's sons

Hereford Mappa Mundi ~1300

'T in O' map

R. Don

R. Nile

Mediterranean

Viking voyages of 'exploration' : 793-1066AD

Faroes 825 (510: St. Brendan)

Iceland 874 (Irish monks earlier)

Greenland 980

Newfoundland 986 (proven in the 1960s)

L'Anse aux meadows, NL
Leif Erikson ~ 995 (1000) AD

Vinland map: Discovered 1957, dated to ~1440
contained 1920s inks and radioactive elements from 1950s showed it to
be a likely fake - did Europeans know about America before 1492 ?

Chinese map, 1763 copied from 1418 ?

Arabic cartography: Al-Idrisi 12th century

The *Tabula Rogeriana*, by Muhammad al-Idrisi for Roger II of Sicily 1154.

The Renaissance (~1400): Ptolemy's world is 'rediscovered'

First European map showing America, 1507
from voyages of discovery: Martin Waldseemüller,

***Voyages of discovery, rediscovering the Greek cartography
But the biggest change in the renaissance and the 2nd millenium was:***

Invention of the printing press by Gutenberg, 1440
(though movable type was developed in China in 1041 by Bi Sheng)

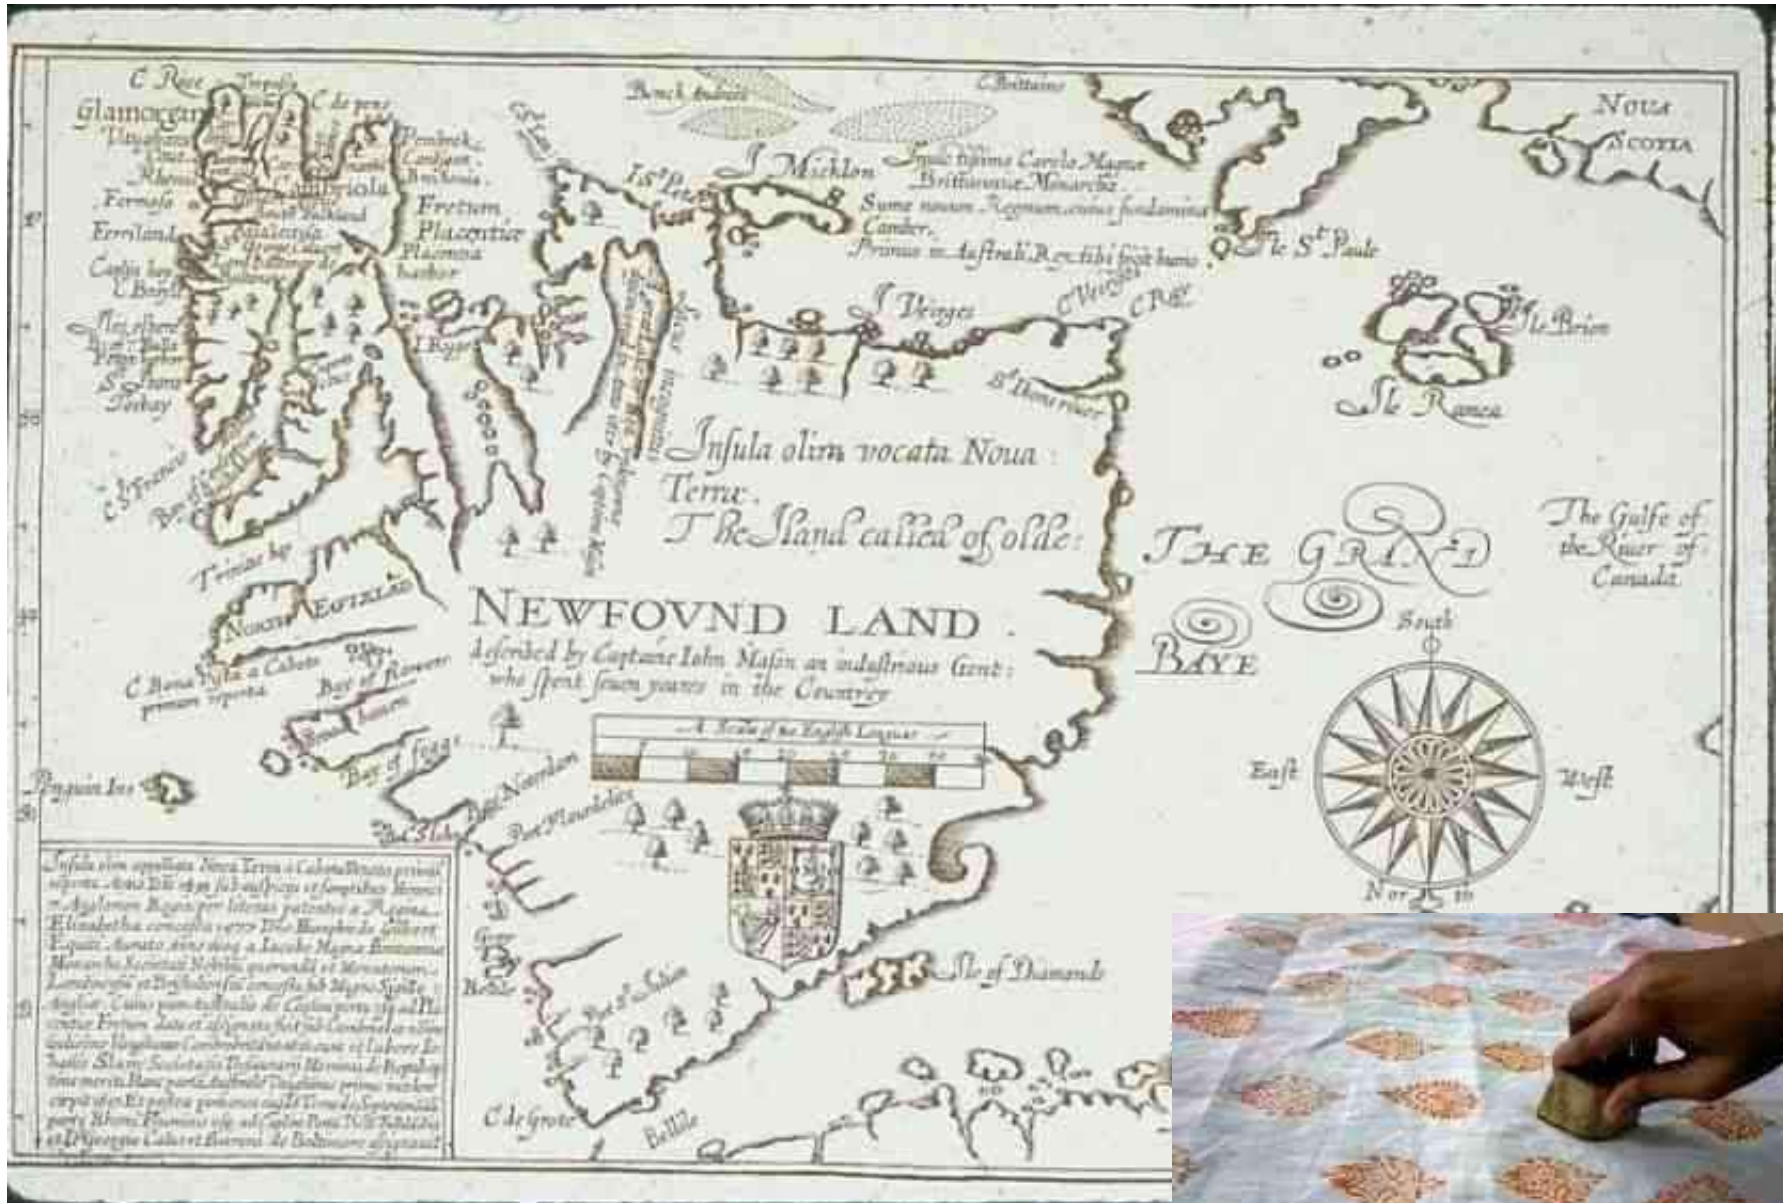

Fig. 20. Map maker and printer of the sixteenth century

Maps (and books) could now be printed in quantity

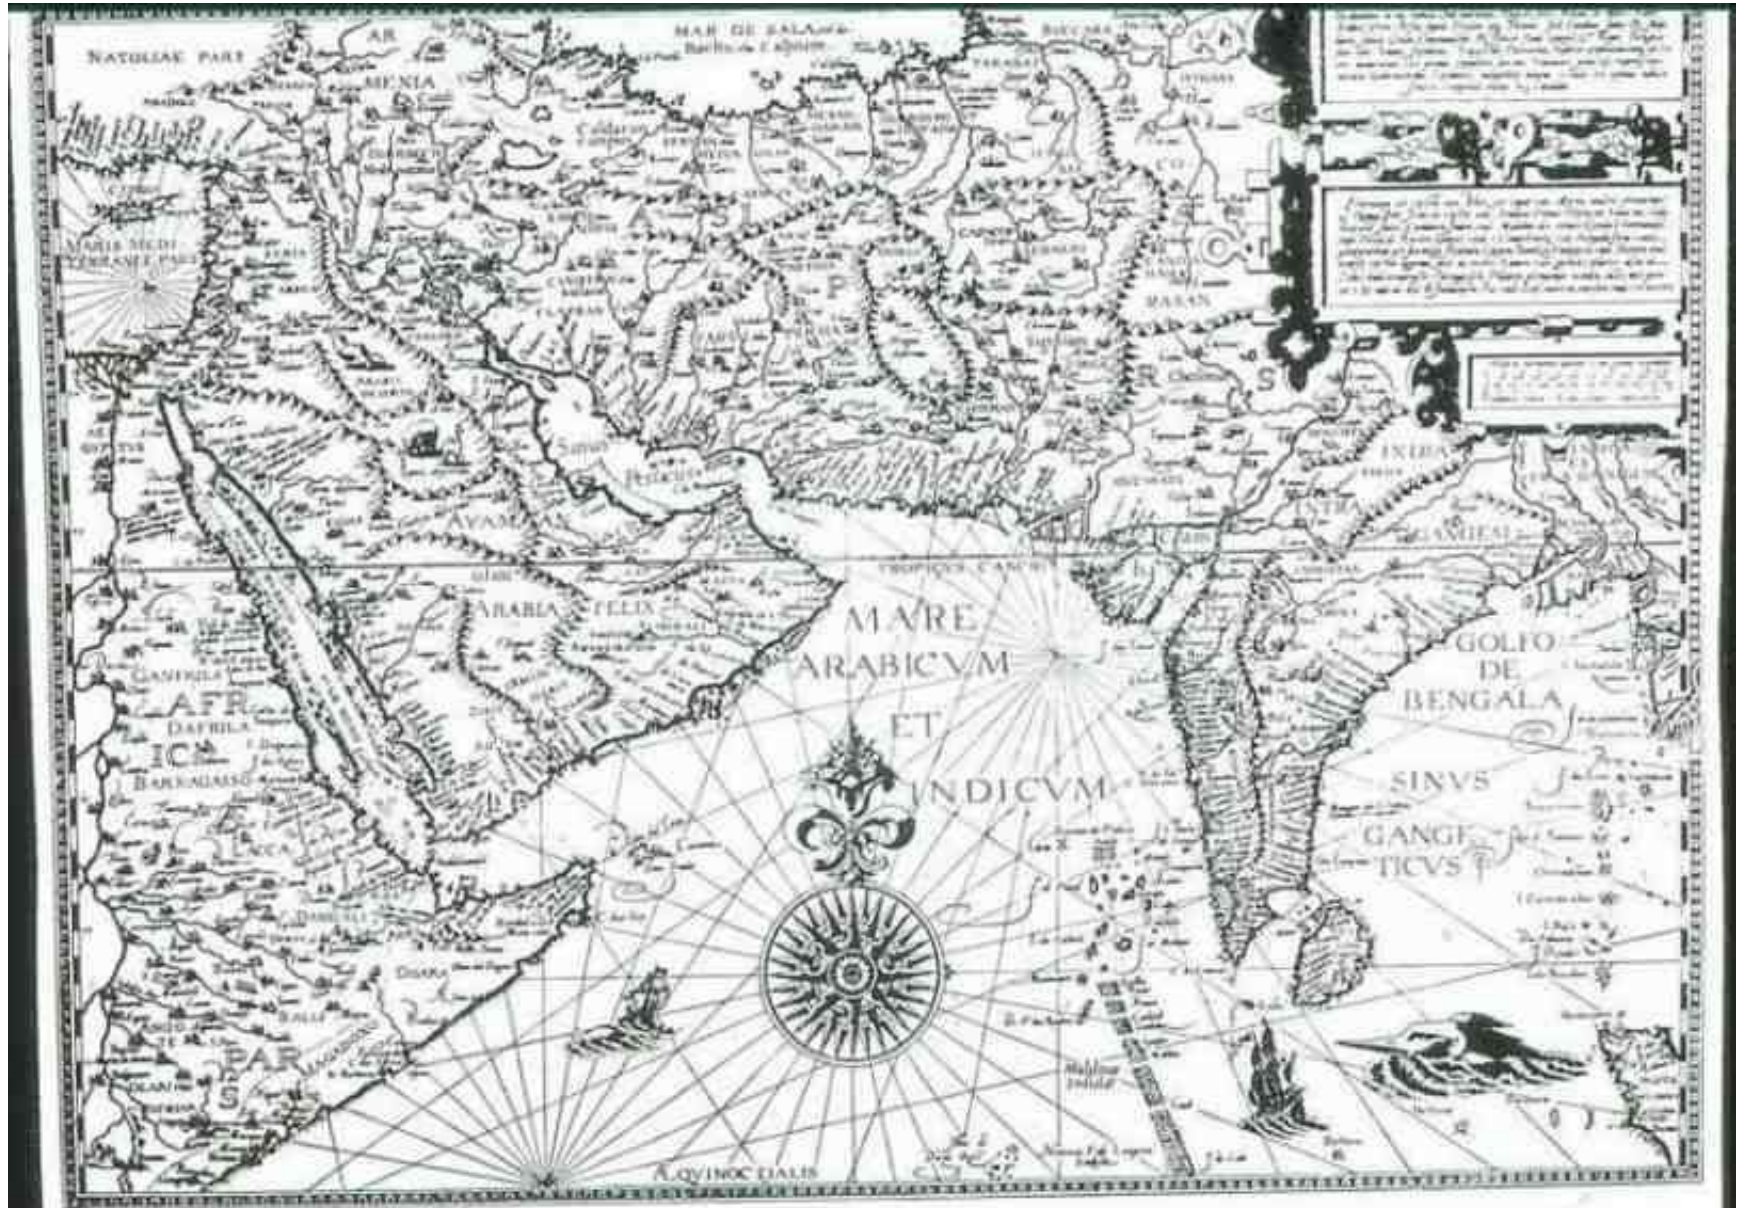

Printing technology: 16th century woodcut

Wrong-reading plate – mirror image

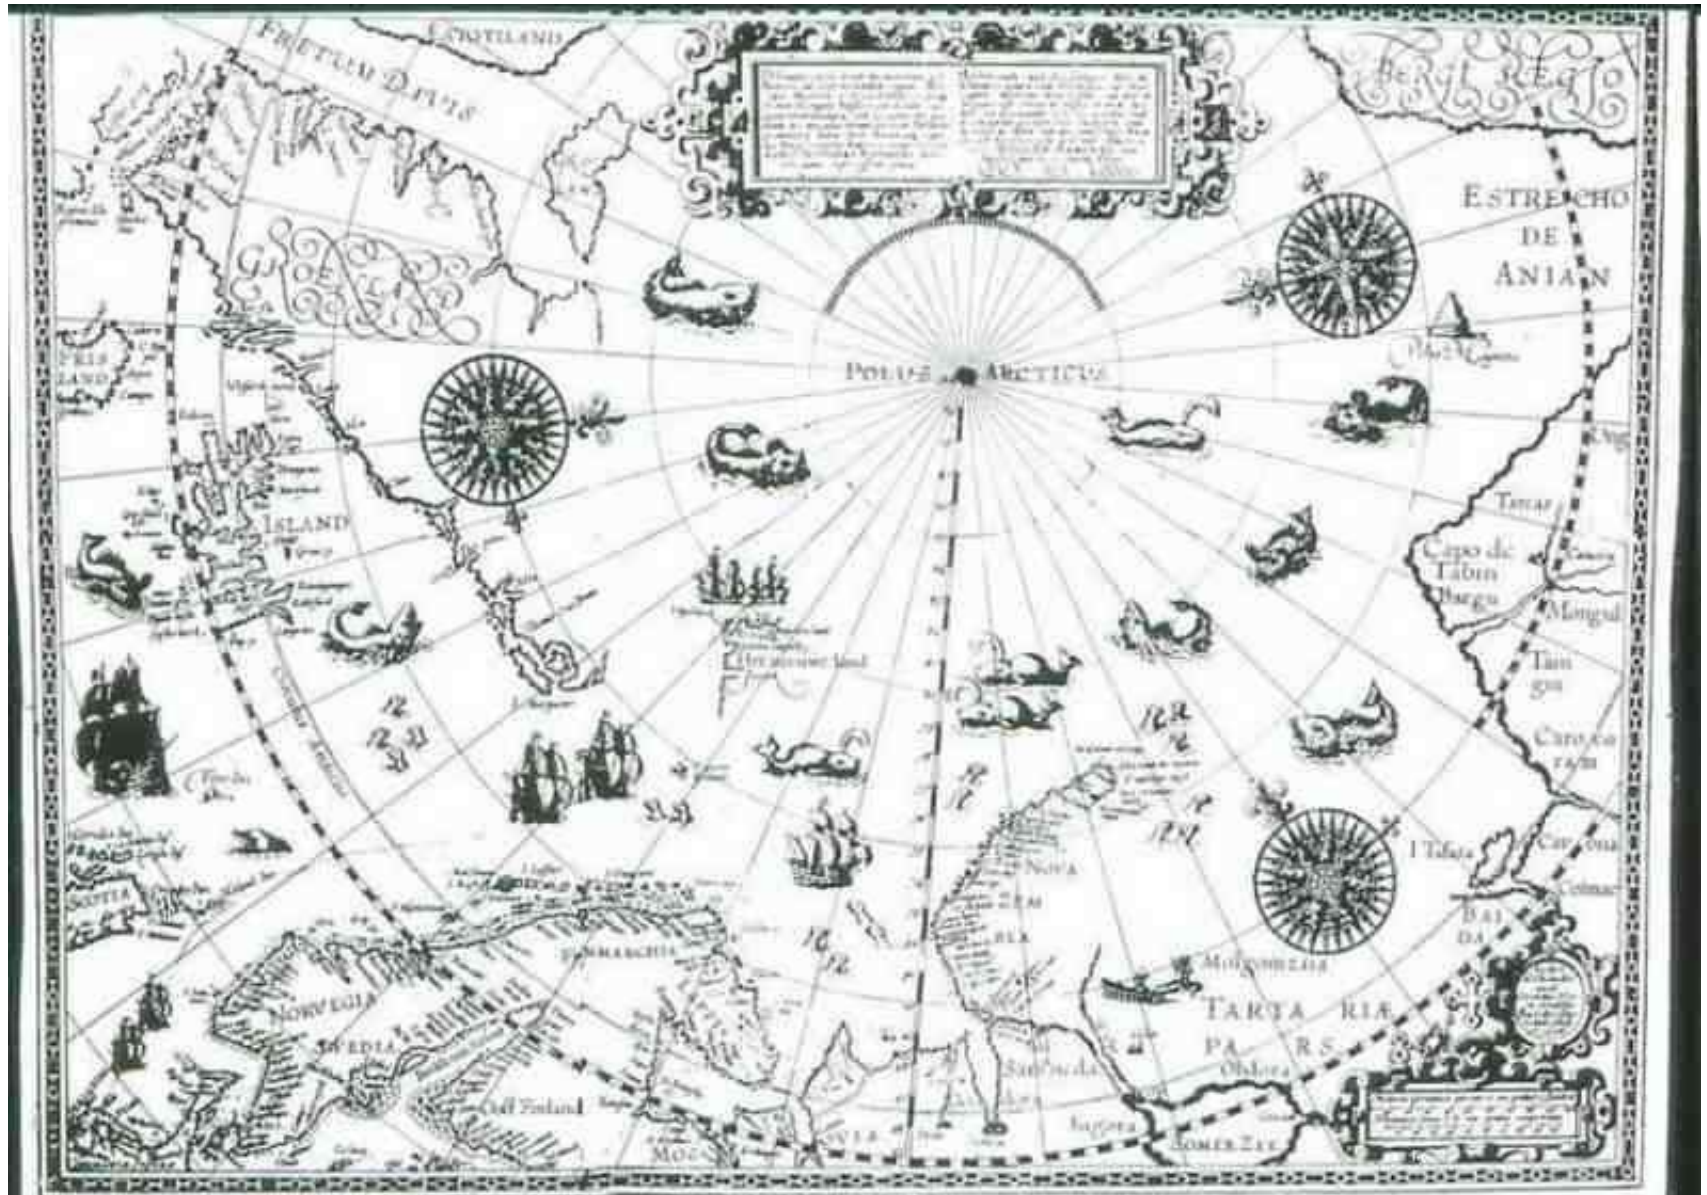

Copper engraving ('intaglio') 1596

The Indian Ocean, engraved by Hendrik van Langeren. In *Linschoten's Itinerario* (Amsterdam, 1596)

16th century map showing 'cartouches' and beasties

The Arctic Regions, by Willem Blaeuw, engraved by Baptista van Deutecum, 1598.

In Linschoten's *Navigatio ac iterum* (The Hague, 1599)

The development of the sciences 1700->

- Division into topographic and thematic mapping
- Development of surveying
- few elevations pre-1800s
- Data collection e.g. census

Halley's 'isogonic' map – lines of equal compass Declination (from true north)

Early 18th century colour map (hand coloured)

Latitude was easy to measure but Longitude ??

Sir Cloudsley
Shovell and grave
Scilly Isles, 1707

Longitude 1759

John Harrison's chronometer

Accurately measured time to compare with local time and how far east/west compared to starting point

Time zones - Sandford Fleming (Canada)

1 hour = 15° longitude

Lithographic (stone) printing plate (1796)

Based on water and oil not mixing - Alois Senefelder

Plate is still created 'wrong-reading' = mirror image
'Transfer lithography' came later

Printing methods

- . Woodcut: image area is raised and holds ink
- . Intaglio engraving: incised cuts hold ink
- . Lithography: surface texture (grease) holds ink

These methods could NOT show continuous shading or colour registration (for layers); all were 'wrong reading'

Photo-lithography & offset printing (1875)

With photo-lithography, full colour map prints were possible. Thin copper plates are produced from photo negatives. Plates wrap around drums, therefore printing was continuous. An intermediate drum added ... to avoid a wrong reading plate.

Impact of offset printing and improved survey technology

**Dufour hachures
Switzerland, 1845-65**

**Bernina Pass,
Switzerland 1877**

1945 ->

20th century

Technology

Aerial photography

Photogrammetry

Post-war (1945)
Mapping of Canada

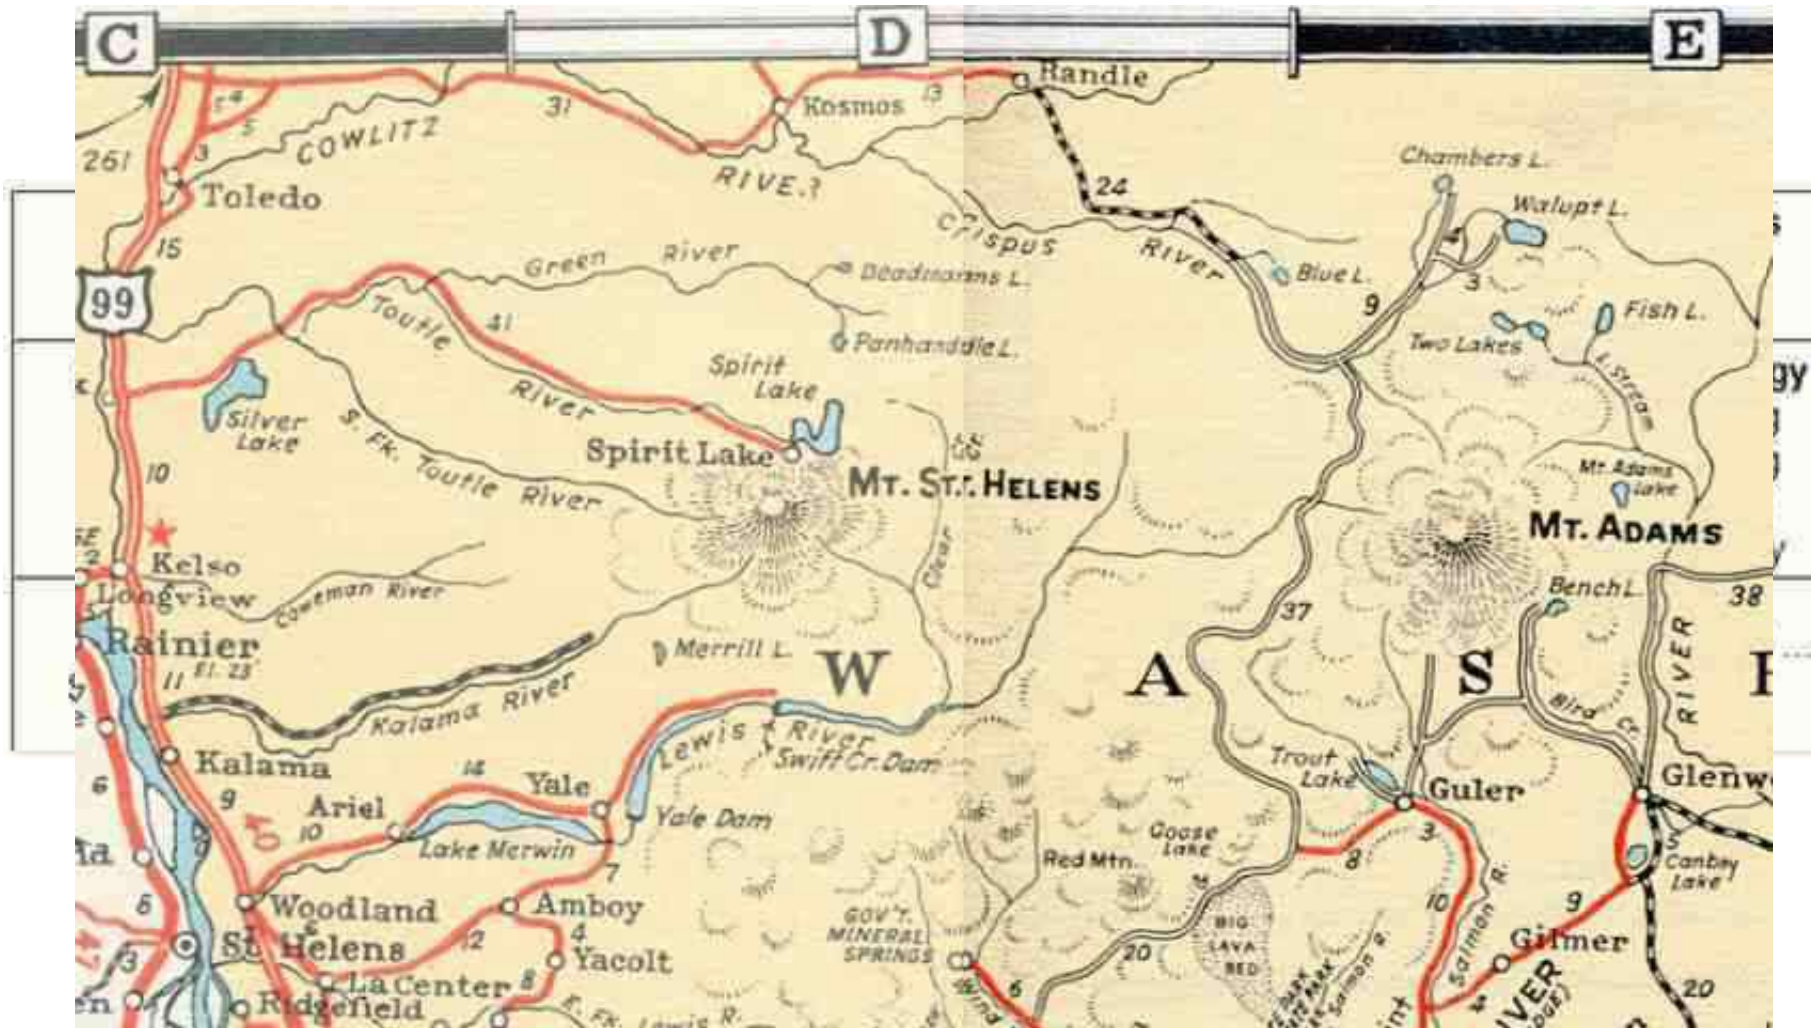

Vancouver - Stanley Park,
downtown, west Vancouver, UBC

Postwar (1950) society changes affecting mapping

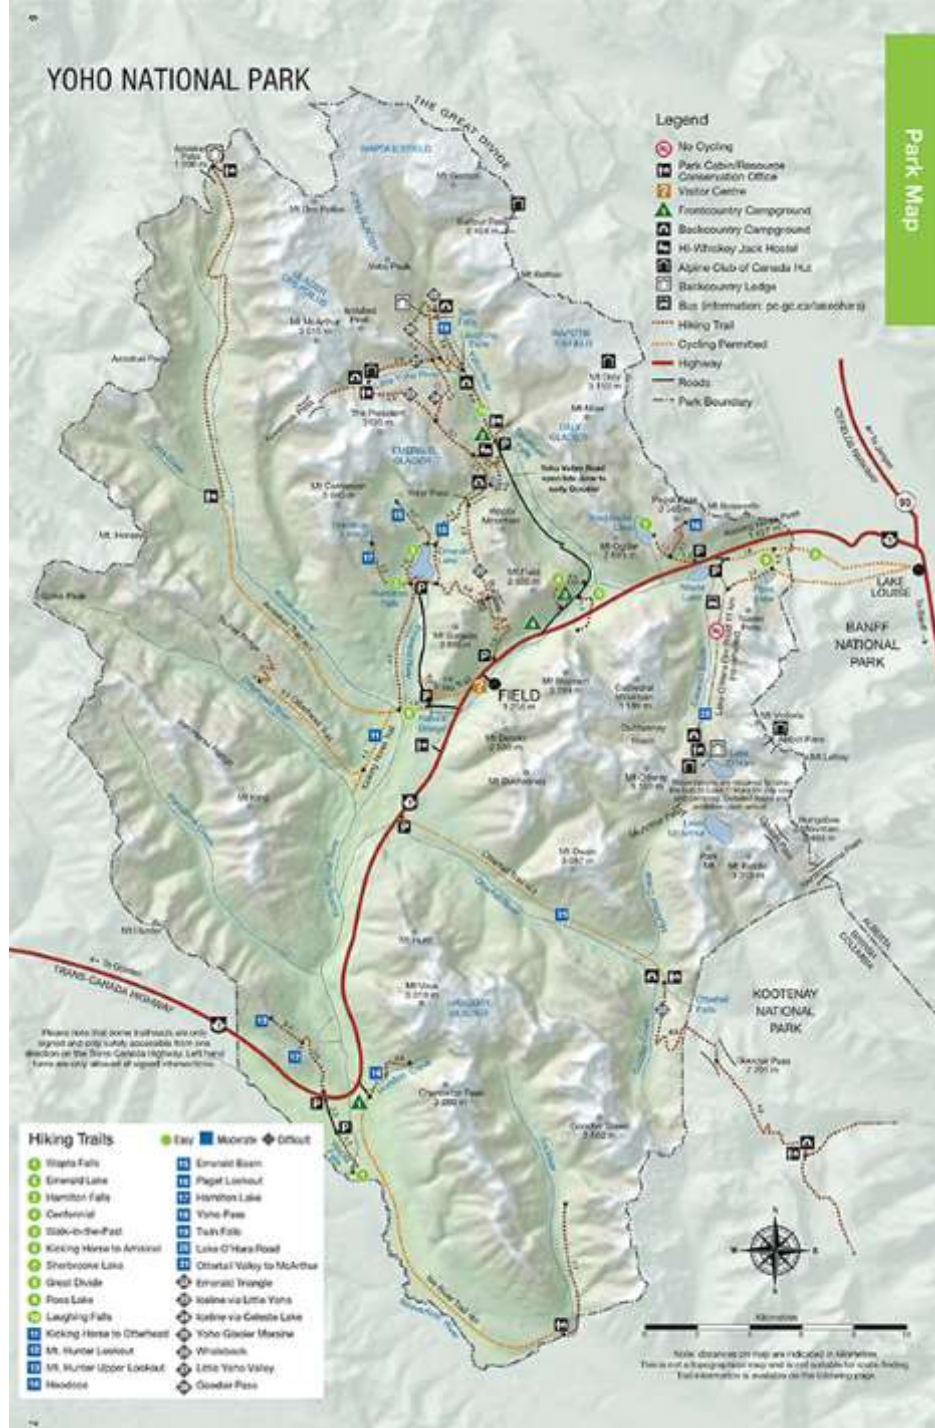

- Increased leisure time and travel - road maps, park maps
- Increased attention to non-scientific users
- Addition of hillshading (still costly before computers)
- Maps for new groups, e.g. visually impaired

Society changes after ~1950 - road maps

<http://roadsandmaps.zxq.net/images/1959OregonOfficial/oregon-west.png>

~1970s Hill shading

Post 1950: Tactile mapping for the visually impaired
