

GEOG 450/650

Advanced Geospatial Analysis

Instructor: Alex Bevington
alex.bevington@unbc.ca

Introductions

- Graduate / Undergraduate
- Why are you in this class
- Program of study / Research interests
- Coding / geospatial experience
 - 250 – Introduction to Geospatial Analysis
 - 300 – Intermediate GIS
 - 357 – Introduction to Remote Sensing
 - 413 – Advanced GIS
 - 457 – Advanced Remote Sensing
- Favorite thing about PG?

A bit about me

- Education
- Work Experience
- Research Interests
- Personal Interests

A screenshot of a LinkedIn profile for Alex Bevington. The profile picture is a circular image of a person wearing a red and white headband and a yellow safety vest. The background of the profile is a scenic landscape with a large blue lake and mountains. The profile information includes the name "Alex Bevington" with a verified badge, the title "Hydrology / Geospatial", and the location "Prince George, British Columbia, Canada". There is a link to "https://bcgov-env.shinyapps.io/nbchydro/" and "500+ connections". On the right side, there are logos for the "Ministry of Forests, Lands and Natural Resource Operations" and the "University of Northern British Columbia (UNBC)". At the bottom, there are four buttons: "Open to", "Add profile section", "Enhance profile", and "Resources".

Night hawks

- Tuesdays
 - 5:30-6:20 PM – Lecture (8-129)
 - 6:30-7:20 PM – Office Hours (8-129)
- Thursdays
 - 5:30-6:20 PM – Lecture (8-129)
 - 6:30-9:30 PM – Lab (GIS Lab 8-125)
- Website
 - <https://gis.unbc.ca/courses/geog-450/>
- Email
 - alex.bevington@unbc.ca

With their parents away, the young dragons would stay up late lighting their sneezes.

This class...

- Seminar-style class
 - Workflows
 - Analysis
 - Research
- Objectives:
 - Build advanced GIS skills.
 - Geospatial programming
 - Tackle big datasets
 - Group activities

The edge of the (flat) Earth: Here There Be Monsters. Image courtesy of www.john-howe.com

Schedule

Jan 7 Introduction,

Jan 9 Geospatial data (**Lab 1:** Digitizing data)

Jan 14 Programming and reproducible workflows

Jan 16 Geospatial programming

Jan 21 Geospatial programming

Jan 23 Guest lecture – *Watershed computation*

Jan 28 Cloud computing

Jan 30 Guest lecture – *Wildfire mapping*

Feb 4 Spatial databases

Feb 6 Guest lecture – *Hyperspectral*

Feb 11 Automation and web GIS

Feb 13 Mid term

Feb 25 Spatial statistics

Feb 27 Guest lecture – Open source data portal

Mar 4 Machine learning

Mar 6 Guest lecture – River forecast centre

Mar 11 AI

Mar 13 Guest lecture – Geospatial for Hire

Mar 18 Advanced visualizations

Mar 20 Guest lecture – Modern Geospatial

Mar 25 Final project presentations

Mar 27 Final project presentations

Apr 1 Exam review

Apr 3 Exam

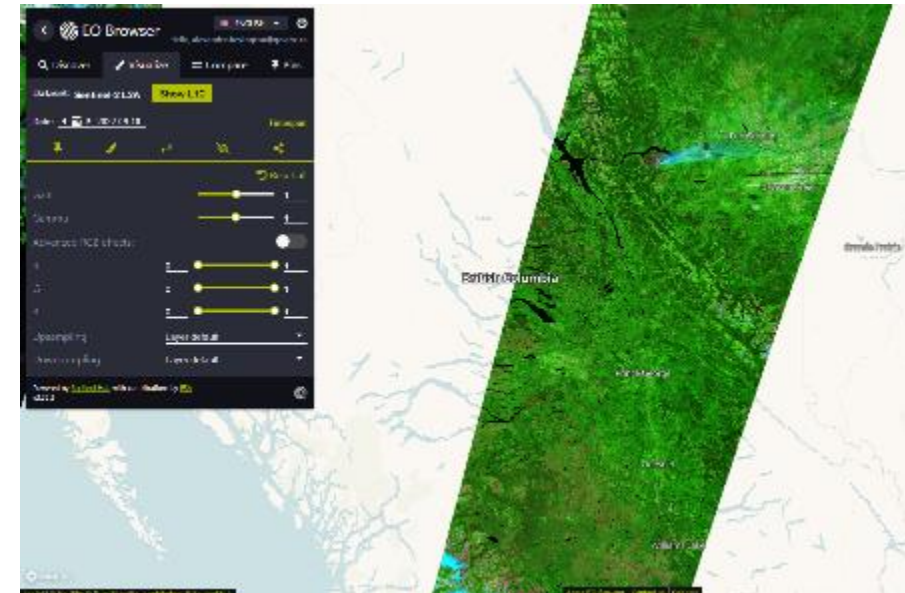

Apr 10 Project deadline

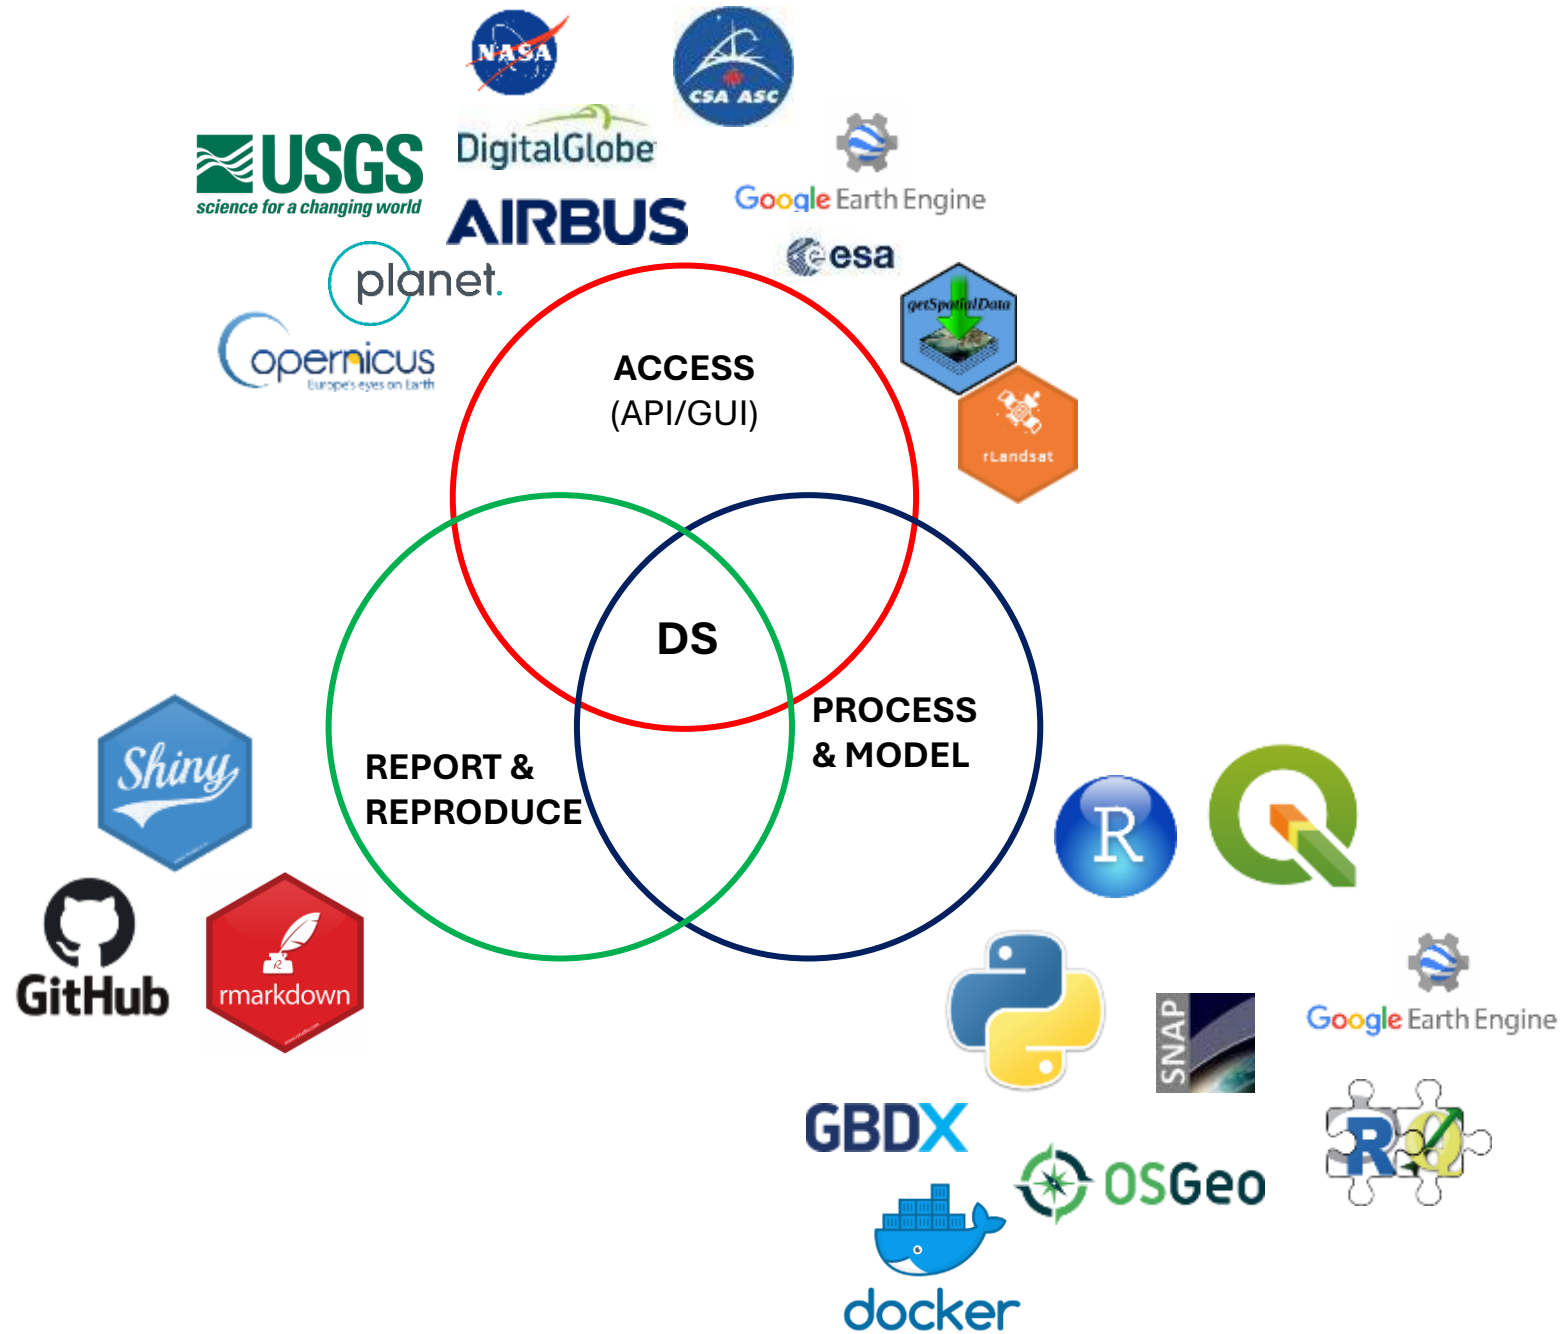

Split class 450/650

- Grading
 - Labs (50%)
 - Participation (10%)
 - Midterm exam (5%)
 - Final exam (10%)
 - Final project (25%)

Homework

- For next lecture be ready to discuss (1 minute elevator pitch) about a piece of geospatial technology in your life

Big data computation... Free or \$

Google Earth Engine (GEE)
Planetary Computer
NASA's EarthData
Sentinel Hub
AWS Open Data (Landsat, Sentinel)
OpenEO
ESRI's ArcGIS Online
Open Data Cube (ODC)
Copernicus DIAS
Jupyter Notebooks + Cloud (AWS, etc.)

How do you want to use Earth Engine?

- Paid usage**
Commercial businesses, government operations. [See examples](#)
- Unpaid usage**
Non-profits, education, government research, training, media. [See examples](#)

Please note: If you will be accessing Earth Engine as a customer of a Google Cloud Platform reseller, please contact your reseller for terms and pricing governing your use of Earth Engine.

Pricing Plans

Earth Engine offers the following pricing plans based on planned level of usage

	Basic	Professional	Premium
Monthly Platform Fee	\$500 per month	\$2000 per month	Contact us
User (developer) allowance	2*	5*	Contact us

<https://cloud.google.com/earth-engine/pricing>

Good decisions 😊

Bad decisions 😞

Quality of decision

No data 😞

Data volume

All the data 😊

The optimist ?

Real-time data with tools

Data **without** tools

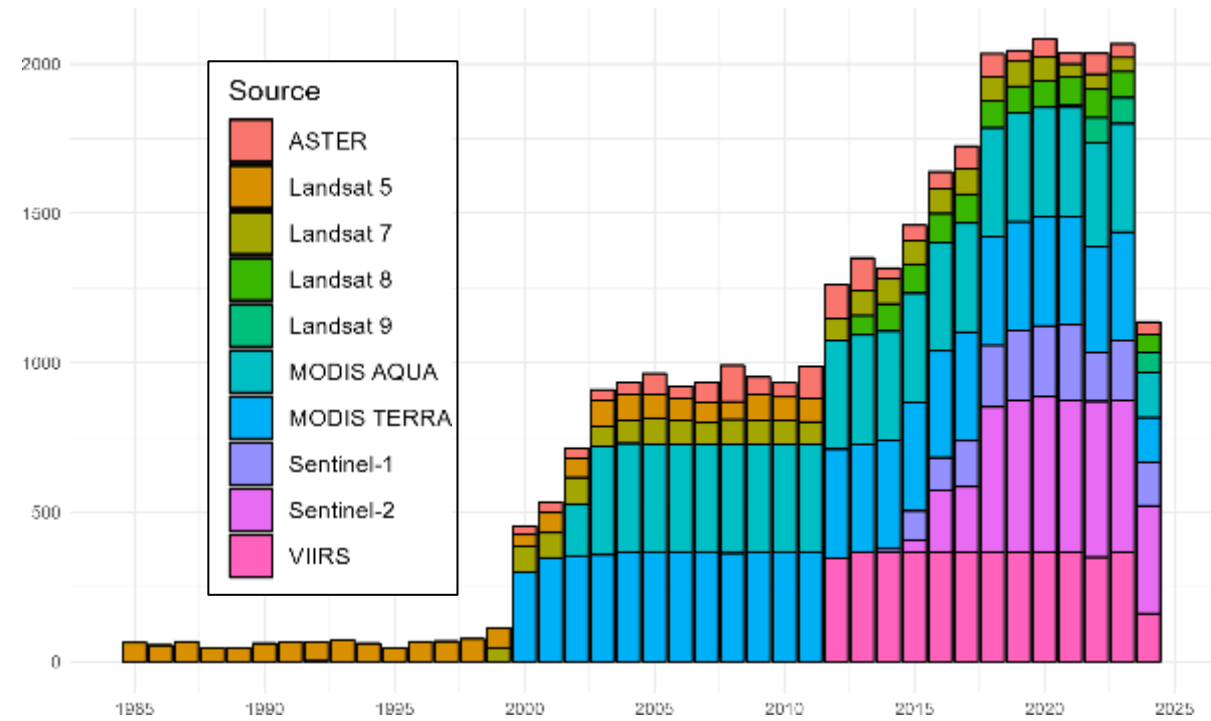

1900

Satellite EO

- Volume of data
- Optical, hyperspectral, thermal, radar, lidar
- Big sats, small sats, wildfireSat
- Next 5 years
